

ABSTRACT OF THE DISCLOSURE

[0050] A technique to navigate through one or more menus of a handheld computer is disclosed. In one embodiment, the technique uses a handheld device having a first button to cause a cursor to navigate through a plurality of menu items and to highlight a desired menu item. The device also has a second button to cause the cursor to navigate through a plurality of menus when the cursor is highlighting one of the menus or a first menu item, and to cause the cursor to highlight a previous menu item when the cursor is highlighting a menu item other than the first menu item.
